

# 5kW stand alone solar system

## Overview

---

In 2025, a 5 kW solar panel system costs around \$13,550 before incentives, based on real installation data from across the country. But your actual price will depend on factors like your roof's complexity, local labor costs, the equipment you choose, and what incentives are. Our 5 kW solar systems feature DIY solar kits which will produce at least 5kW (or 5,000 watts) of power. This translates to approximately 10 to 20 kilowatt-hours (kWh) per day, depending on your location and other factors. Choose from a selection of 5kW solar kits with string inverters. Optimal Sweet Spot for Homeowners: 5kW solar systems provide 40-90% energy coverage for average households while requiring only 299-400 square feet of space, making them ideal for most residential applications without overwhelming roof space requirements. This affordable, high-efficiency 5.4 kW. The average size of a home solar panel system in the United States of America is 5-6 kW. Why trust EnergySage?
