

A family of four using solar power

Overview

Generally speaking, a family of four will require anywhere from 3 to 8 solar panels, depending on these various factors. To determine exactly how many solar panels you'll need for your family of four, you should first assess the size of your roof. The answer depends on several factors, such as the size of your roof, the type of solar panel system you choose, and how much of your electricity usage you want to cover with solar energy. Once you know how many solar panels you need, you're one step closer to finding out how much solar costs. Averages make for good rules of thumb, but how much will switching to solar energy cost YOU and how many PV modules do you need to meet your family's electricity requirements?
