Base stations and networks

Base Stations Enable Mobile Communications
 Antennas Are Placed in Various Locations
 More Mobile Devices Means More Base Stations
 Base Station Output Power Is Low
 Exposure Limits Are Set by Independent Organizations
 Exposure Levels Are Much Lower Than The Limits
 Public Access Is Restricted Where Needed
 No Adverse Health Effects According to The Who
 The antenna output power level is typically between 10 and 100 watts for an outdoor base station. Television transmitters, by comparison, usually have a thousand times higher output

power than outdoor base stations. Antennas mounted indoors have about the same power as mobile phones. See more on ericsson
