

Acrylic board instead of photovoltaic glass

Overview

Low iron or iron free tempered glass is usually the go. There's a bloody good reason why all of the solar panel manufacturers. In both industrial and commercial applications, clear acrylic sheets —especially cast clear acrylic sheets —are rapidly becoming the preferred alternative to traditional glass. From advertising lightboxes to public safety enclosures, the benefits of acrylic are pushing glass aside in more and more. Sometimes it pays to go simple and substitute in cost-effective acrylic or polycarbonate sheets. But after working with factories, testing prototypes, and overseeing multiple purchases, I've seen how acrylic keeps winning. Acrylic sheet has become a go-to replacement for glass in countless applications, from windows to crafts. Its unique mix of strength, versatility, and affordability makes it a better choice than glass for many projects. In the realm of plastic alternatives, acrylic stands out as a promising candidate.
