

Amsterdam battery electric vehicles bevs

Overview

This report presents a comprehensive overview of the Dutch battery electric vehicles (BEVs) market, the effect of recent high-impact world events on it, and a forecast for the market development in the medium term. According to RAI Vereniging and BOVAG, 13,968 new BEVs were registered in the Netherlands, compared with 10,965 in October 2024. This represents an impressive year on year increase of 27 percent. In September 2024, the Netherlands Enterprise Agency announced a new subsidy scheme to help fund private charging infrastructure for commercial vehicles. This resulted in a 52% market share for plug-in technology, making it the country's dominant powertrain. BEVs alone accounted for 42% of registrations. Este crecimiento se debe en parte a los próximos cambios fiscales.
