

# Argentina s new home solar all-in-one machine

## Overview

---

Designed for Argentine households, this 10KW/20KWH solar energy system is the ideal solution for achieving energy independence and reducing electricity costs. The country just crossed 7,133 MW of total renewable capacity as of May 2025, finally getting serious about clean energy. Solar accounts for nearly 20% of renewable generation, pumping out 446 GWh in November 2024 alone. Not bad for a sector that's been called "underdeveloped" by pretty much. Argentina's renewable energy capacity grows with 65. 8m) dedicated to building two solar farms in the province of Mendoza, western central Argentina. These projects will increase Genneia's current installed renewables capacity, which stands at 1,004 MW of. YPF Luz has started feeding electricity from the first 100 MW of its 305 MW El Quemado solar project into Argentina's national grid, the first renewable plant under the Large Investment Incentive Regime (RIGI).
