Overview

Split-phase 24 kW hybrid system with advanced MPPT tracking and seamless source switching. The container holds 20 solar panels, with capacity to integrate an additional 40-panel ground or roof array for a total of up to 60 panels (24,000W DC). Our pioneering and environmentally friendly solar systems: Folded solar panels in a container frame with corresponding standard dimensions, easy to unfold thanks to a sophisticated rail system and no shading from a remaining container structure. LZY mobile solar systems integrate foldable, high-efficiency panels into standard shipping containers to generate electricity through rapid deployment generating 20-200 kWp solar. Providing 24/7 clean energy with scalable solar capacity of 30-200kW and battery capacity of 50-500KWh. Engineered for disaster response, remote sites, and temporary installations with 95%+ uptime reliability. Reduce energy costs by up to 70% compared to diesel generators, with ROI typically. Would you like to generate clean electricity flexibly and efficiently and earn money at the same time?

With Solarfold, you produce energy where it is needed and where it pays off. At the heart of this chaos-turned-opportunity?
