Energy storage system

Energy storage system

Overview

BYD is launching a new Blade EV battery next year to power its next wave of vehicles. It's been over four years since BYD's battery unit FinDreams launched the first Blade battery. In a move that could reshape the global electric vehicle (EV) industry, BYD—the world's largest EV manufacturer—has unveiled a revolutionary battery that removes lithium from the equation entirely. (A Yangwang U7 on display at the April 2024 Beijing auto show. Set to hit the market in August 2024, this revolutionary battery technology represents a quantum leap over its predecessors and could fundamentally transform how we think about EV. Today, BYD officially announced the launch of the Blade Battery, a development set to mitigate concerns about battery safety in electric vehicles. The new battery promises enhanced driving range, faster charging, and a 15% reduction in cost compared to its predecessor.

Byd next generation battery

BYD Blade 2.0 (2026 Update): 1,000km Range, 210Wh/kg & Specs

The second generation of BYD lithium iron phosphate (LFP) battery, BYD Blade 2.0, promises longer driving range, extended lifespan, and unparalleled safety. Its structure can withstand ...

BYD to Launch Next-Gen Blade EV Battery in 2025 with 15% Cost ...

As competition in the electric vehicle (EV) battery market intensifies, BYD is gearing up to launch its next-generation Blade EV battery in 2025. The new battery promises enhanced driving ...

BYD's Battery Revolution -- No Lithium, No Limits

BYD plans to deploy the new Blade Battery in both consumer and commercial vehicles, including its growing electric bus division. By eliminating lithium, cobalt, and nickel--other high ...

EV game-changer: Next-gen Blade

battery from BYD to ...

Cao Shuang revealed that BYD is planning to release the next generation of Blade batteries for EVs in 2025.

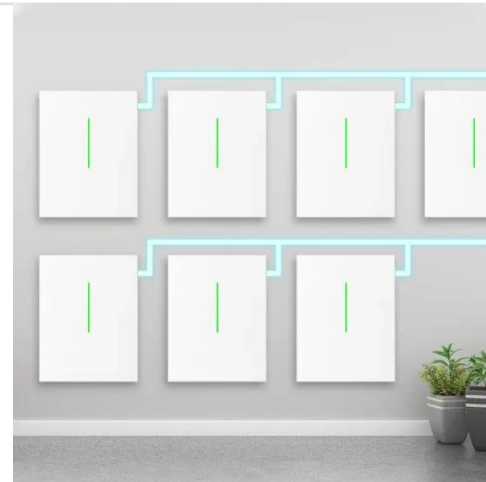

BYD's Gen 2 Blade Battery Will Power Every Model from 2025

Set to hit the market in August 2024, this revolutionary battery technology represents a quantum leap over its predecessors and could fundamentally transform how we think about EV ...

BYD confirms next-gen Blade EV battery is coming with more range

Next year, BYD will launch its next-gen Blade battery, which will unlock even more range for upcoming EVs. The advanced new batteries are more compact, safer, and more efficient than ever.

BYD Blade Battery (incl. Gen II): Everything you should know

BYD says its LFP technology is at the heart of its new energy vehicle (NEV) line-up. The largest manufacturer of LFP

batteries expects them to account for more than 60% of the global ...

Innovative New BYD Blade Battery Lowers Cost and Increases Range ...

These advancements, such as the innovative new BYD blade battery, are increasing the range of EVs and decreasing charging time. More efficient vehicle and battery production, including vertically ...

BYD to launch next-gen blade battery in 2025, exec says

BYD (HKG: 1211, OTCMKTS: BYDDY) will launch its next-generation battery next year, which is expected to deliver better range performance for vehicles.

BYD's New Blade Battery Set to Redefine EV Safety ...

Today, BYD officially announced the launch of the Blade Battery, a development set to mitigate concerns

about battery safety in electric vehicles.
