

Can I bring an solar container outdoor power to Dominica

20 ft container

40 ft container

Overview

For new properties we can integrate solar panels into the roof and for commercial buildings or apartment blocks we can include a 20 foot container fully fitted and equipped with batteries, inverters and power control units. Dominica needs solar to maintain the unique environment providing power for hotels and eco sites but also charging points for EV car and motor bikes and commercial vehicles. This part of the Caribbean is very susceptible to hurricanes and Dominica has had three very destructive storms since 2007. Lower your environmental impact and achieve. This brings me to my question: we are considering to bring in (new) equipment to upgrade out power system to be fully self-sufficient on Solar (essentially a grid supported system using lithium battery storage). The machines are calibrated, the staff is trained, and the first major order is waiting. Enjoy the videos and music you love, upload original content, and share it all with friends, family, and the world on YouTube.
