Overview

Yes—it's possible, but it depends on the roof's structural condition. While age isn't always the issue, a roof with visible damage, leaks, or deteriorating materials can pose a risk to both the installation and the longevity of the solar system. Installing solar on historic homes is quite possible with a careful approach and understanding. Historic homes, especially those listed on the National Register of Historic Places. Can you really get solar on older homes?

It's one of the most common concerns we hear from homeowners: “I live in an old house — won't solar damage the roof?”

” “My roof's made of slate/Yorkshire stone/clay tiles. The long answer?”

Let's. With solar roof tiles designed to blend seamlessly into traditional architecture, even the most iconic rooftops can become sources of clean energy without losing what makes them timeless. Historic buildings are like fine wine—they can improve with age. But that doesn't mean they're. Assessing the roof of an older property stands as a pivotal initial step. An inspection should include checking for sagging, water damage, or decay in wooden components.
