

Charging station cost per kWh

Overview

Public charging typically costs \$0.60 per kWh, varying by charger type, network, and location. Level 2 often runs much cheaper than DC fast, memberships and per-session fees change the math, and some locations tack. In April 2025, the average price of residential electricity was 17. Find answers to the most common questions asked about charging an EV at home when switching from gas to electric. Pricing for DC fast charging is determined by charger location, your plan, and the maximum power level your vehicle can accept. Real-time pricing is available in the app or at the charger. On average, residential electricity is around \$0.
