

# Continuous stamping die for photovoltaic bracket

 **TAX FREE**    

**Product Model**  
HJ-ESS-215A(100KW/215KWh)  
HJ-ESS-115A(50KW 115KWh)

**Dimensions**  
1600\*1280\*2200mm  
1600\*1200\*2000mm

**Rated Battery Capacity**  
215KWH/115KWH

**Battery Cooling Method**  
Air Cooled/Liquid Cooled

ENERGY STORAGE SYSTEM

## Overview

---

This continuous stamping process adds a chamfering step between the outer edge cutting step and the arching step, squeezes the material around the tearing band into a more compact structure, reduces the risk of tearing of the arc edge in the flanging step, and ensures the service. This continuous stamping process adds a chamfering step between the outer edge cutting step and the arching step, squeezes the material around the tearing band into a more compact structure, reduces the risk of tearing of the arc edge in the flanging step, and ensures the service. IMH Products provides onshore stamping services designed specifically for solar and renewable energy applications. With decades of stamping expertise and a press fleet ranging from 40 tons to 800 tons, we produce the brackets, frames, and structural supports that solar systems depend on. From brackets and clips to terminals and enclosures, our progressive stamping process supports high-volume. We manufacture the precision metal stamped parts and metal bending you need to sustain your projects long into the future. Our more than 55 years of experience as an ISO-9001 certified company speaks for itself. Our expertise in crafting high-volume parts using our extensive capabilities ensures that your project requirements are met with. The Solar Industry is hard at work powering the grid for the next generation. That's where Devore Engraving comes in -.
