

Convert optical disks into solar panels

Overview

Learn how to turn old CDs and DVDs into DIY solar panels in this amazing project tutorial! This video shows you how to recycle CDs and DVDs and convert them into homemade solar panels to harvest free energy from the sun. The process involves repurposing CDs or DVDs as substrates, 2. Using a conductive material to create solar cells, 3. In recent days, a video has gained viral traction across social media platforms, captivating viewers with an innovative idea: transforming discarded CDs into functional solar panels. Step-by-step, you'll transform discarded media discs into I. Unlike traditional solar panels requiring expensive silicon, this method uses aluminum-coated discs - essentially free raw materials with built-in light-reflecting surfaces. This article investigates the entrancing system behind changing these apparently obsolete circles into practical energy sources, revealing insight into the science, bit by bit.
