

# Democratic republic of the congo off-grid systems

## Overview

---

Over 17 off-grid solar companies are registered in the DRC; of which a handful of companies, including Congolese companies such as Altech, GoShop and Weast Energie, and international companies such as BBOXX and Orange Energie, have sold over 200,000 solar lanterns, a. Over 17 off-grid solar companies are registered in the DRC; of which a handful of companies, including Congolese companies such as Altech, GoShop and Weast Energie, and international companies such as BBOXX and Orange Energie, have sold over 200,000 solar lanterns, a. In the quest to tackle energy challenges in the Democratic Republic of Congo (DRC), JNTech is spearheading the adoption of hybrid solar-diesel microgrid systems. These systems are designed to provide a reliable power supply to remote areas, bridging the gap where traditional electrical grids are. This article explores how microgrids are becoming a key tool for overcoming energy scarcity and achieving energy independence in remote areas. Sweden, through the Embassy in Kinshasa, is supporting the. New minigrd projects in the Democratic Republic of Congo and Zambia will accelerate access to clean, reliable electricity for rural populations. (Source: Marian Galovic/Shutterstock).

## Democratic republic of the congo off-grid systems

---

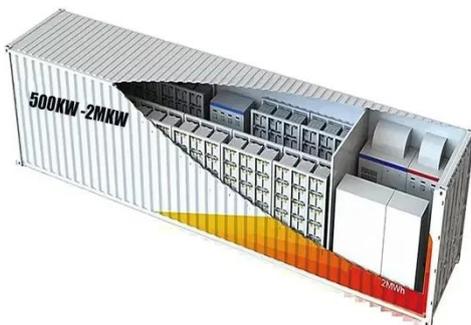

### Democratic Republic of the Congo

With a widely dispersed population and a national grid that does not reach the majority of the population, there is enormous potential for off-grid solutions for both solar home systems, mini-grids and ...

---

### Africa's Largest Mini-Grid to Provide Affordable and

With an electrification rate of just 19%, DRC has the second-highest number of people globally -- about 77 million -- without access to electricity. Less than 2% of rural areas are electrified.

### Democratic Republic of Congo

However, there is no public off-grid electricity service and private sector delivery is hampered by a weak regulatory environment, fiscal framework, lack of access to credit, and inefficient import procedures. ...
