

# Do I need to buy tools to install photovoltaic panels

## Overview

---

You need solar panels, inverters, racking equipment, and performance monitoring equipment to go solar. You also might want an energy storage system (aka solar battery), especially if you live in an area that doesn't have net metering. This guide will walk you through all the necessary tools you'll need to safely and effectively install your own solar power system, from basic hand tools to specialized solar equipment and software. Some people avoid this problem by installing solar panels themselves. While installing solar panels may seem like a big task, but with the right tools and proper preparation, it becomes a manageable and rewarding project. Missing even one essential tool can lead to costly mistakes, safety hazards, or inefficient energy production. Depending on where you live, you may also consider a solar battery. But different product options and brands can.

## Do I need to buy tools to install photovoltaic panels
