

# Does Egypt s energy storage power station need a BESS for the power generation side

## Overview

---

AMEA Power has completed commissioning of the first large-scale battery energy storage system (BESS) in Egypt, ahead of the start of commercial operations. Once viewed as a supporting technology, battery storage is increasingly being treated as essential infrastructure—one that underpins. The 300-MWh Abydos BESS project, which is aligned with a 500-MW solar power facility, makes the site near Aswan in southern Egypt home to the country's first utility-scale integrated solar-plus-storage installation. Courtesy: Trina Storage Energy storage also has entered the picture. The 300 MWh facility, fully powered by solar PV. The company's first utility-scale storage project in North Africa is said to reinforce the company's capabilities in delivering large-scale, integrated renewable energy and storage solutions AMEA Power has announced the successful commissioning of Egypt's first utility-scale Battery Energy Storage. Dubai-headquartered AMEA Power announced yesterday (25 February) that it has signed government Capacity Purchase Agreements (CPAs) for the battery energy storage system (BESS) projects, which will have a combined capacity of 1,500MWh. Meanwhile, Norwegian developer Scatec ASA has signed a 25-year power purchase agreement (PPA) for a 1 GW solar array and 100 MW/200 MWh BESS in.
