

# EU photovoltaic support requirements

## Overview

---

The European Solar Charter, signed on 15 April 2024, sets out a series of voluntary actions to be undertaken to support the EU photovoltaic sector. Solar energy, in particular photovoltaics (PV), is currently the fastest growing renewable energy source in the EU. Last year, 56 GW of solar PV were. For example, while Germany, Italy, and France all provide formal support mechanisms, their project implementation paths and fiscal outcomes differ widely. These differences are not incidental but are the result of long-standing national and local policy systems. For businesses evaluating market expansion. Achieving the 2030 EU target of at least 42.5% renewable energy by 2030, with an ambition to reach 45%, will require further acceleration in the deployment of renewable energy, including solar energy.

## EU photovoltaic support requirements

---

### EU photovoltaic support requirements

Support to the ongoing preparatory activities on the feasibility of applying the Ecodesign, EU Energy label, EU Ecolabel and Green Public Procurement (GPP) policy instruments to solar

---

### National Policy Recommendations for Solar (PV) Panels

Facilitate tenants' access to solar power Under Articles 21 and 22 the Renewable Energy Directive, collective self-consumption should be facilitated by the Member States and grid operators.

### 2025 European Photovoltaic Policy Map: Deployment Paths and ...

A comprehensive analysis of the 2025 European commercial and industrial photovoltaic policy map, focusing on deployment strategies, incentive comparisons, and zero-investment models ...

---

## Solar energy in buildings

The Commission adopted its EU solar energy strategy in May 2022 and aims to reach at least 700 GW of solar photovoltaic (solar PV) by 2030. The EU had around 338 GW solar PV installed in 2024, but ...

### European Union

The Net-Zero Industry Act Regulation (NZIA), which provides a regulatory framework to boost the competitiveness of EU net-zero industry, including solar PV, entered into force in June 2024.

### Legislation and initiatives

The alliance and its members contribute to the massive, rapid deployment of renewable energy in Europe and the EU solar energy strategy, which aims to install over 320 GW of solar PV by 2025, ...

### How Solar Energy Policies in Europe Are Changing in 2025

For solar companies, installers, and EPCs, staying on top of solar energy policies in Europe isn't optional anymore--it's critical for compliance,

financing, and future growth. These policy ...
