

Energy storage power station installation project in sydney australia

Overview

Iberdrola Australia has officially opened its 65MW/130MWh Smithfield battery energy storage system (BESS) in western Sydney, New South Wales, ahead of schedule. The Australian arm of Spain-based utility and independent power producer (IPP) Iberdrola confirmed that the 2-hour duration BESS has been. The Iberdrola Group is making progress in its drive for electrification in Australia with two new energy storage milestones in the state of New South Wales. It acts as a shock absorber in the event of power surges from events like lightning strikes.

Energy storage power station installation project in sydney australi

Iberdrola's 130MWh BESS in NSW ready for commissioning

Iberdrola Australia is developing several utility-scale battery storage systems, including the 270MW/1,080MWh Kingswood battery project near Tamworth, New South Wales. This represents the ...

Ausgrid goes big with two 400 MWh battery projects in Newcastle and Sydney

New South Wales electricity distributor Ausgrid is proposing two, 200 MW / 400 MWh battery energy storage systems to be located in the north coast regional city of Newcastle, and Sydney suburb of ...
