

Flow Battery Product Development

Overview

In this forward-looking report, FutureBridge explores the rising momentum behind vanadium redox and alternative flow battery chemistries, outlining innovation paths, deployment challenges, and market projections. This technology strategy assessment on flow batteries, released as part of the Long-Duration Storage Shot, contains the findings from the Storage Innovations (SI) 2030 strategic initiative. The objective of SI 2030 is to develop specific and quantifiable research, development, and deployment (RD&D). To support the commercialization of flow batteries and continued research and improvement, Battery Council International established the Flow Battery Industry Group in 2023 as well as the annual Flow Batteries North America conference.
