

# Gambia clean electricity

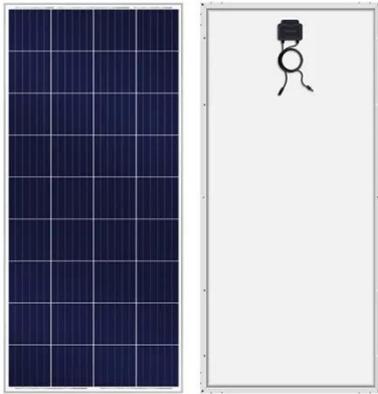

## Overview

---

The Gambia has committed to ambitious plans in the near term, including President Barrow's desire to achieve universal electrical access by 2025, as well as a commitment to reduce CO2 emissions in alignment with the 2015 Paris Accords, with a focus on imports from Senegal. The Gambia has committed to ambitious plans in the near term, including President Barrow's desire to achieve universal electrical access by 2025, as well as a commitment to reduce CO2 emissions in alignment with the 2015 Paris Accords, with a focus on imports from Senegal. Banjul, 10th October 2025: The Gambia has officially launched its National Energy Compact, joining the ambitious Mission 300 (M300) initiative, a joint programme by the World Bank and the African Development Bank that seeks to provide electricity access to an additional 300 million people across. energy for all by 2030. This National Energy Compact provides the roadmap to accelerate the pace of implementation he SDG7 target of 2030. The process towards universal electrification is anchored on The Gambia's multi-year energy sector roadmap (2021-40) and Yiriwaa National Development Plan. The Gambia's President Adama Barrow announced that 90% of Gambians are expected to have access to electricity by the end of 2025. Gambian electricity is entirely derived from fossil fuels, with no low-carbon sources contributing to the country's energy mix.
