

GoodWe solar inverter maximum temperature

Overview

For example, GoodWe inverter uses a dual 85-film capacitor, which withstand up to 85 °C high temperatures and 85% humidity. In addition, all GoodWe inverters pass an aging test at 50 °C in a high humidity, sealed room for 6 hours to simulate extreme temperature conditions and ensure their maximum. The temperature of some parts of the inverter may exceed 60°C during operation. To avoid being burnt, do not touch the inverter during operation. Keep children away from inverters. The inverter. The specification of the protective device must be greater than 1. • Only qualified professionals or trained personnel are allowed to install, operate, maintain, and replace the equipment or parts. It is incredibly lightweight, weighing only 4.
