

Hongshaping Wind Power Station

Hongshaping Wind Power Station

Newsroom-detail

The floating PV and onshore wind power project share the booster station and transmission lines, successfully converging wind farm, PV station and storage device in the same site.

A floating power plant in the sky? China's flying wind turbine

Reports from Jan describe how China 's flying wind turbine completed a grid-connected test, effectively operating as a floating power station that taps strong winds high above the ground.

Shanghai greenlights pioneering offshore solar-wind hybrid project

Located off the coast of Fengxian district on the northern shore of Hangzhou Bay, the project forms part of Shanghai's broader strategy to integrate offshore wind and solar energy. It will be co-located ...

Optimizing onshore wind power

Installation within China via

This study proposes the geographical multi-objective decision-making of different wind power schemes, which attempts to provide practical implications for the rational deployment of wind power ...

The Status and Prospects of Offshore Wind in China

The offshore wind power industry clusters in China e construction of offshore wind industry clusters. The focus is on building offshore wind bases in Guangdong, Fujian, Zhejiang, Jiangsu and Shandong, with emphasis on ...

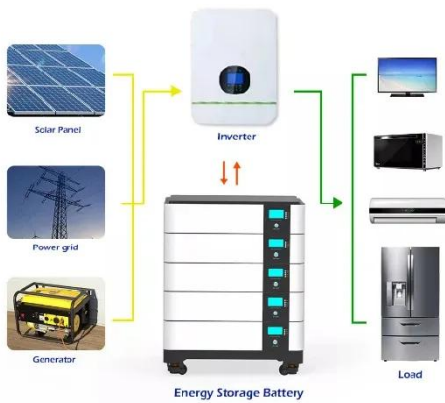

A floating power station? China tests wind turbines in the sky

Wind power could soon come from the sky as China has successfully tested a megawatt-class airborne turbine that generates electricity while hovering 2000 metres up.

Onshore Wind: Top 10 Projects and Companies in China in 2025 and ...

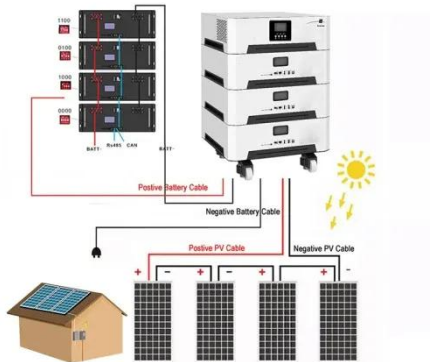

Explore data-driven insights into China's onshore wind market. Learn how massive capacity growth and domestic

manufacturing make it a global energy powerhouse.

World's largest monolithic floating wind power platform unveiled in

This innovative platform is set to advance offshore wind power development from nearshore to deep-sea areas, offering a solution to achieve carbon neutrality goals.

Massive offshore wind platforms help expand renewable power industry

Construction of the world's largest single-platform floating wind turbine was officially completed in Guangzhou, Guangdong province, on Wednesday, promoting the development of the country's offshore wind ...

China unveils world's largest floating V-shaped wind power station!

Discover the assembly and deployment

process of China's largest floating V-shaped wind power station, engineered by Mingyang. This innovative offshore wind turbine boasts a 16.7MW
