

How big a generator should a solar power station use

Overview

A medium-size generator (around 1000 Wh) with good surge capacity and sufficient solar panel input is a practical choice to cover power outages without excess bulk. To run a house with a solar generator, you need the right size. The size depends on your power needs and usage. Start by adding up the wattage of everything you want to run, like refrigerators, lights, laptops, or medical equipment, and choose a solar generator that can handle both the running watts and the. After researching solar generators for 5+ years and helping countless readers choose the right size, I've learned that sizing a solar generator correctly is the most critical factor in emergency preparedness. Includes wattage charts, expert tips, runtime formulas, and more.
