

How is solar photovoltaic power generation billed

Overview

When your solar panels produce more power than your home is using, typically midday, your system exports the extra electricity to the utility grid. Through net metering, your utility tracks that export and issues you energy credits, either in kilowatt-hours (kWh) or dollars. If you've recently gone solar, your first solar bill might leave you wondering, How do solar panels work with your electric bill?

That's a common question—and totally normal. The way your utility tracks energy use, calculates credits, and applies extra charges can be confusing at first. The three main billing options - Solar Lease, Solar PPA, and Solar Loan - present distinct financial avenues for harnessing solar energy. Thoughtful consideration of prerequisites. Do you still have an electric bill with solar panels?

Yes, you'll still have an electric bill before and after your solar panels are installed and producing clean energy. Why is my. Solar energy billing can sometimes be challenging to understand, especially when integrating generation, consumption, and net metering.
