

# How long does it take for Huawei solar container communication stations to charge

RS485  
Communication between battery and inverters  
Baud rate:9600bps

RS485 Interface  
Communication between parallel packs or BMS and PC  
Baud rate:9600bps

## Overview

---

Batteries can be charged for a maximum of three times during storage. Before charging a battery, you need to check its appearance. Energy Storage System Products List covers all Smart String ESS products, including LUNA2000, STS-6000K, JUPITER-9000K, Management System and other accessories product series. It has 16 PV 460kWp JASolar panels and SUN2000-6KTL-M1 inverter with 10kWh LUNA2000 battery. I would like to keep it as long as possible to be operational at its best capacity. I have checked and read couple of forums and some people suggest: I had it. Emerging markets in Africa and Latin America are adopting mobile container solutions for rapid electrification, with typical payback periods of 3-5 years. Major projects now deploy clusters of 20+ containers creating storage farms with 100+MWh capacity at costs below \$280/kWh. Only when neither proves sufficient will the batteries be utilized. Please confirm with your local product.
