

How much does 500W solar power cost

Overview

How much do 500-watt solar panels cost?

A 500-watt solar panel typically retails for \$300 or more, but many manufacturers require you to order multiple 500-watt panels at a time. If you want the most watts for the lowest price in August 2025, bifacial 144-cell 500W+ panels are your best value. Highlighted budget picks below (Philadelphia Solar 550W, Axitec 550W, SolarSpace 580W) deliver large per-panel output at aggressive \$/W pricing — and bifacial designs can boost. On average, a 500-watt solar panel can generate about 2 kilowatt-hours of electricity in a day. Residential users may be better off going with less powerful panels, but it's worth doing the math for yourself to see how your options stack up. Installation costs can add an additional \$500 to \$2000, depending on the complexity of the installation and local labor. A 500-watt solar panel offers high power output and efficiency, allowing you to generate more energy with fewer panels. This is ideal for maximizing available roof or ground space. Here's what drives pricing: “The solar sweet spot?

Mid-tier panels offering 20-21% efficiency - they balance cost and performance.
