

# How much does a battery that can store 50 kWh of electricity cost

## Overview

---

How much does a 50 kWh energy storage battery cost?

The cost of a 50 kWh energy storage battery typically ranges between \$5,000 and \$15,000, depending on several factors including battery technology, installation expenses, and additional features. As the global shift toward electrification accelerates, battery technology plays a pivotal role in shaping the future of energy. Too little storage leaves you vulnerable during outages or unable to maximize your solar savings. In this in-depth exploration, we will dissect the various elements that contribute to the price range. Example Calculation: Suppose you're purchasing a battery with a total size of 87 kWh and a cost per unit of \$38/kWh. The cost per unit of power is \$120/kWh.
