

How to punish those who install too many photovoltaic panels

Overview

Non-compliance with solar codes leads to several penalties that affect both the installation process and long-term ownership. Understanding these consequences helps avoid costly mistakes and protects your solar investment. Most states provide legal protections for solar installations while allowing reasonable restrictions, and conflicts can be. Can utility deny solar install due to too many people having installed solar?

I had a solar company come out for an install estimate and the rep kept claiming I needed to act right away because my neighborhood could become a 'blackout' zone for solar installs. He claimed my utility provider can. The decision by a homeowner to put solar panels on his roof or on a ground-mount on his property can sometimes lead to issues with his neighbors. The Post-Star newspaper in Glens Falls, New York, recently delved into one of these scenarios. Many people find themselves helpless when faced with defective work. Misrepresentations have spurred the ire of state AGs when solar companies exaggerate their systems' potential to save consumers money, despite financing that may end up costing the consumer more. But what happens if someone skips the rules or doesn't meet the requirements?

That's where penalties come into play.
