

I use solar photovoltaic panels at home

Overview

Let's start with the fundamentals of home solar, including how solar panels work, the equipment and the size system you need, and the pros and cons. Before you dive into our beginner's guide, there are a few solar terms that are important to know so you can fully. Is my home suitable for solar panels?

Solar panels are built to work in all climates, but in some cases, rooftops may not be suitable for solar systems due to age or tree cover. Before you agree to anything, know what you're getting. Depending on the option you choose, you might get certain tax breaks or need to take extra steps. A home solar energy system costs between \$18,000 and \$20,000 before any incentives and typically saves homeowners around \$1,500 annually. Today, going solar is a routine home improvement.
