

Ic2 solar generator only generates half of its power

Overview

It should be noted that although technically the night on Minecraft only lasts 7.5 minutes, solar panels only produce power during the day which lasts 10 minutes (half of the day/night cycle) because dusk and dawn are treated as non-generation time. They require little effort to set up correctly, and each one consistently provides 1 EU/t on clear, sunny days, and as long as the more expensive GregTech 4 recipe is not enabled, they're also fairly affordable. Because of the low power generation, you are encouraged to use Ultra-Low-Current Cable. Problem: Some of my solar panels produce power just fine. However, the solar panels above my miner produce no output at all. Extreme low voltage is 0 to 5 eu/p. Solar Panels are generators that utilize the energy of the Sun to generate EU and thus require an unobstructed view of the sky (you can place glass over it).

IC2 solar generator only generates half of its power

[1.10.2] [AoE] IC2 Power Generation Question

Although it would be somewhat expensive, I'm just wondering whether you could use an IE fermenter with your fruit of choice and a Forestry bio generator to make a stable and renewable ...

A primer to IC2 power : r/feedthebeast

It most certainly does not lose you 75% of the power you run through it. Which also highlights another issue: EU/t is pretty clearly a measure of power (and would be measured in watts in real life); it's not ...

Solar Panel (IndustrialCraft 2)

It should be noted that although technically the night on Minecraft only lasts 7.5 minutes, solar panels only produce power during the day which lasts 10 minutes (half of the day/night cycle) because dusk ...

Your power progression? :

r/feedthebeast

I rarely use any IC2 or GregTech items, so the amount of BuildCraft power I can generate is fairly high and reasonable. Later at step 4, I'm usually putting off about 500 MJ/t, which I've yet to build any ...

Solar Panel (Industrial Craft) , Technic Pack Wiki , Fandom

As the name suggests, Solar Panels need sunlight in order to generate power. Solar Panels will generate no power at night, and no power during storms. In order to generate power, the panel must ...

Solar Panel (IndustrialCraft)

Solar Panels are one of the two generators that do not require a resource to maintain effective power output (like the Wind Mill). However, they must remain in use for a very long time to "pay off" the ...

Support Request: Some Solar Panels not Producing Power

Problem: Some of my solar panels produce power just fine. Some others do not. As illustrated in the attached

screenshots, the solar flower that is on top of my factory works as intended. ...

Solar Panel (IndustrialCraft 2)

The Solar Panel from IndustrialCraft 2 is an upgraded version of the Generator that produces EU from the sun. The Solar Panel will only create EU during a clear day, and if there are no opaque blocks ...
