Overview

The International Energy Agency (IEA) says global renewable energy capacity is set to almost double over the next five years. It says the energy crisis has forced governments to accelerate already existing renewable energy targets. Energy markets began to tighten in 2021 because of a variety of factors, including the extraordinarily rapid economic rebound following the pandemic. The price of. A global energy crisis began in the aftermath of the COVID-19 pandemic in 2021, with much of the globe facing shortages and increased prices in oil, gas and electricity markets.
