

Instructions for Use of Hybrid Lead-Acid Battery Cabinets

Overview

This manual contains important instructions that should be followed during installation of Vertiv™ Liebert® APM2 Battery Cabinet and accessories. The cabinets covered by the technical specification have been designed to contain the hermetic lead-acid electric accumulator batteries. The construction characteristics of the recombination type lead-acid electric accumulators (valve-regulated hermetic accumulators); the absence of acid fumes and. 2081-9279, 110 Ah rechargeable sealed-lead acid batteries provide reliable and repeatable discharge and recharge characteristics for use in fire alarm and other systems applications. Racks are supplied unassembled. Recent updates require hydrogen detection sensors in lead-acid battery cabinets, as hydrogen concentrations above 4% pose explosion risks.

Instructions for Use of Hybrid Lead-Acid Battery Cabinets

Battery Room Ventilation and Safety

This course describes the hazards associated with batteries and highlights those safety features that must be taken into consideration when designing, constructing and fitting out a battery room. It ...

Liebert® NXTM Battery System

This manual contains important instructions that should be followed during installation of your Liebert NX Battery Cabinet and accessories. Read this manual thoroughly, paying special attention to the ...
