

Is it good to install photovoltaic panels in winter

Overview

Winter is an ideal time to install solar panels. And not just because panels continue generating electricity —installing them during this season can offer advantages many people don't know about. Photovoltaic solar energy doesn't depend on heat but on light. Most homeowners save. Homeowners often ask, “Do solar panels even work in winter?”

” The short answer is yes they do, and in some cases, they may perform better in colder temperatures than in the summer.
