

# Is it not allowed to use lithium in djibouti s energy storage power station

## Overview

---

While no explicit ban exists, Djibouti's environmental guidelines favor: Djibouti's average temperature of 30°C impacts battery performance. Local operators prefer solutions with: "Battery solutions must withstand Djibouti's harsh climate while meeting strict safety standards. Djibouti's energy transition has sparked global interest, especially regarding its stance on lithium-based storage systems. The country's energy mix is evolving, with a growing emphasis on renewable sources such as. Imagine a lithium battery system the size of three football fields, quietly stabilizing electricity supply for an entire city. That's exactly what the Djibouti City Lithium Battery Energy Storage Power Station brings to East Africa's energy landscape. The initiative has completed over 1,200 rentals and is in the process of increasing the number of 250Wh batteries available from 20 to 80 Ushering in the future of off-grid life, Liquidstar's Waypoints in Djibouti enable electricity-based financial inclusion, e-mobility, increased water access, and. Coastal regions, exposed to strong and consistent winds, are perfectly suited for wind energy production, exemplified by the exceptional performance of Djibouti's first wind farm in early 2023.
