

# Is it really cost-effective to install solar panels on the roof

## Overview

---

Solar panels on a roof are a proven way to reduce electricity bills, increase home value, and lower carbon footprint. Not only is your roof's current condition an important consideration, but weighing the cost and timing of performing your roof replacement and solar panel installation at the same time can also be beneficial. However, the initial costs and practical concerns merit consideration. Structural integrity: A professional inspection can determine if the existing roof can support the added weight of solar panels. The cost to replace roof with solar panels typically ranges from \$25,000 to \$50,000 for most homes, but doing both projects together can save you \$4,000 or more compared to separate installations. Combined with the 30% federal tax credit extended through 2032, most homeowners can achieve payback periods of 6-12 years with 25+.
