

Is the fishing boat flashing light powered by solar energy

Overview

They are solar powered through a 4V polycrystalline silicon solar panel and two 600mAh lithium batteries, allowing up to 3 days of continuous operation or flashing for 6 days when fully charged. Versatile Uses: Our reliable marine signal lights can display fishing nets, road obstruction warnings, livestock locations, and more, enhancing safety. Ensure Safety at Sea: Automatically flashes at night and on cloudy days, ensuring 24-hour effective illumination. Safety and hazard lighting ideal for marking breakwaters, channels, and boating hazards, and identifying docks, mooring locations, navigation aids, and obstructions at night. Featuring an industrial strength solar powered light, designed for salt and fresh water use.
