

Kenya PV grid-connected inverter

Overview

Grid-connected solar systems use an inverter that converts the energy collected from the solar PV panels into conventional AC power and feeds it to your electrical circuit breaker panel. As long as there is enough sun, no electricity will flow in from the utility company (Kenya Power). Solis Inverters One of the most popular brands in Kenya. Shop for all types of solar inverters on solarstore. Dual MPPT Technology: Dual Maximum Power Point Tracking ensures. Grid-tie inverters are specialized devices that convert direct current (DC) electricity, generated by solar panels or other renewable sources, into alternating current (AC) electricity, which is the standard used in most homes and businesses. With its 10,000W capacity and multiple MPPT trackers, it ensures maximum solar energy harvesting even under varying sunlight conditions.
