Overview

The European Union (EU) has funded a project worth N\$52. 6 million to provide renewable energy to 32 households of Swakopmund's DRC informal settlement as part of a memorandum of understanding between the EU and the Environment Investment Fund of Namibia (EIF). According to the European Union's (EU). European Commission President Ursula von der Leyen unveiled today a €545 million Team Europe package to accelerate Africa's clean energy transition. This announcement, made at the Global Citizen Festival via video message in the context of the United Nations General Assembly, is an important. The European Union has pledged 545 million euros (\$636 million) for projects focused on modernizing power grids, increasing access to renewable energy, and supporting clean energy projects in nine African countries. Renewables investment in the continent is expected to create 38 million green jobs by 2030. Credit: Anatoliy Cherkas/Shutterstock. Jozef Sikali, European Commissioner for Partnerships, announced the commitment at the World Economic Forum in Davos. Africa at a crossroads: Resource-rich, infrastructure-poor Africa is richly endowed with natural resources, sunlight, wind, minerals, forests, fertile lands, and freshwater bodies. Yet, paradoxically, the continent faces a massive infrastructure gap. By Babawale Obayanju The Democratic Republic of.
