

Microgrid system leader

Overview

Schneider Electric, the global leader in the digital transformation of energy management and automation, has been ranked No. 1 in the 2025 Guidehouse Research Leaderboard for Microgrid Integrators, and recognized as a top five company globally in the Distributed Energy Storage. A microgrid is a small-scale, localized energy system that can operate independently or together with the traditional utility grid. It typically combines renewable energy sources (like solar panels), energy storage systems (like lithium batteries), smart inverters, and advanced control software. It's like having your own personal energy island, disconnected from the grid. A microgrid is essentially a small-scale power system that can operate independently.
