### Integrated lithium niobate photonic millimetre-wave radar

Here we overcome these challenges and demonstrate a centimetre-resolution compact photonic mmWave radar based on a 4-inch wafer-scale thin-film lithium niobate (TFLN) technology.

---

### Improving Communication Performance in High-mobility Environments ...

To deal with these issues, we developed millimeter-wave base station cooperation technology to enable multiple base stations to cooperate with each other while suppressing inter-mobile-station ...

---

### 60 GHz Millimeter Wave Radar Technology for Li-ion Battery ...

The document details a novel approach to evaluate the electrical properties of Li-ion battery electrode films without physical contact, utilizing 60 GHz mmWave radar technology. By ...

exploration, and vital-sign monitoring<sup>1</sup>. In the forthcoming 6G era, millimeter-wave (mmWave) radars operating at even higher frequencies above 30 GHz and with broader bandwidths ...

**smart millimeter-wave base station for 6G application based on**

This work provides great potential for programmable metasurfaces to aid the development of novel and intelligent millimeter-wave base stations, offering

valuable insights for ...

### Millimeter wave for lithium-ion batteries in solar container

The mechanical performance (modulus and density) of the electrode is dynamically changing during cycling, which will influence the dispersion characteristics of ultrasonic guided waves ...

### The Role of Millimeter-Wave Technologies in 5G/6G Wireless

In this paper, the relevant millimeter-wave enabling technologies are reviewed: they include the recent developments on the system architectures of active beamforming arrays, ...

### A smart millimeter-wave base station for 6G application based ...

Here, we propose a large-scale 2-bit millimeter-wave programmable

metasurface to build an integrated smart base station framework for 6G communications. The meta-array is composed of ...
