

# New energy storage project in northern Kenya

## Overview

---

Nairobi, Tuesday, J: The Kenya Electricity Generating Company PLC (KenGen), has commissioned a new Battery Energy Storage System (BESS) to supply uninterrupted renewable power to its modular data center, marking a new frontier in Kenya's long-term green energy. Nairobi, Tuesday, J: The Kenya Electricity Generating Company PLC (KenGen), has commissioned a new Battery Energy Storage System (BESS) to supply uninterrupted renewable power to its modular data center, marking a new frontier in Kenya's long-term green energy. Nairobi, Tuesday, J: The Kenya Electricity Generating Company PLC (KenGen), has commissioned a new Battery Energy Storage System (BESS) to supply uninterrupted renewable power to its modular data center, marking a new frontier in Kenya's long-term green energy strategy. The newly. KenGen's recent launch of a 1. 16 megawatt-hour (MWh) Battery Energy Storage System (BESS) in Nairobi came with all the typical trimmings of a milestone event. The system, installed to power a modular data centre located at KenGen's headquarters, is meant to showcase how battery technology can play. The BESS will power KenGen's modular data centre in Nairobi. 16 megawatt-hour (MWh) BESS was built to supply uninterrupted renewable power to KenGen's 52-kilowatt Modular Data Centre (MDC), which houses 356 U-spaces dedicated to supporting the company's expanding digital. The storage system is designed to guarantee stable electricity even during periods of low grid demand, underscoring the role of battery technology in enhancing energy resilience. 36GW in August 2025, with just 3GW in effective supply capacity (assuming the wind is blowing and the sun is shining!). With power outages on the rise and a freeze on new Power Purchase Agreements (PPAs) only just appearing to be lifted, the pressure to.
