

Panda Solar Power Designer

Overview

Instead of aligning the solar arrays in rows and columns to form a grid, a Chinese company proposed an innovative design for the 50MW solar farm in Datong, China: that of a giant panda. 50 climate solutions from cities in the People's Republic of China Panda Green Energy in Datong is building a panda-shaped solar power plant covering more than 1 million square meters, fostering innovation and engaging the PRC's youth in clean power generation. China Merchants New Energy, which is also one of the country's largest clean energy operators, completed the. Built by the company Panda Green Energy, the project has the capacity to power more than 8,000 homes with a total output of 50MW. It uses the data analysis library pandas and is compatible with the commonly used MATPOWER / PYPOWER case format. The panda farm is the first of Panda Green's several bear-shaped farms that will provide as much as 100 megawatts of power.
