

Photovoltaic energy storage construction and operation and maintenance

Overview

This page provides information to assist with the operation and maintenance (O&M) of photovoltaic (PV) systems. Return to the Life Cycle of PV Systems. This report is available at no cost from the National Renewable Energy Laboratory (NREL) at www.nrel.gov. National Renewable Energy Laboratory, Sandia National Laboratory, SunSpec Alliance, and the SunShot National Laboratory Multiyear Partnership (SuNLaMP) PV O&M Best Practices. After solar energy arrays are installed, they must undergo operations and maintenance (O&M) to function properly and meet energy production targets over the lifecycle of the solar system and extend its life. Reported O&M costs vary widely, and a more standardized approach to planning and delivering O&M can make costs more predictable. Approaches evident in the wind industry. With this gap in mind, this report aims to provide.
