

Photovoltaic panel theft incident report

Overview

Immediate Response: If solar energy is stolen, the following actions are essential: 1. Document the situation through photographs and videos. This rapid expansion has brought about a corresponding rise in the number of solar panel installations, both residential and commercial. Thefts at operating solar sites is an increasingly common reality. While much of the industry conversation focuses on prevention, fewer discussions address what owners should do once a theft has already occurred, when systems are impacted, production is disrupted and multiple stakeholders are involved. Solar panels were stolen from a solar farm. Solar panel theft is the primary issue, although some landowners report that it isn't just the panels themselves that are stolen but theft has long been an issue in the UK. The UK's experience is mirrored in Europe.
