

# Photovoltaic panels are directly fixed on the wall

## Overview

---

Wall mounted solar panels offer an alternative for properties where roof orientation or available roof space isn't ideal for solar installations. Instead of fixing panels on a pitched roof, they are mounted directly onto a vertical surface, often utilising parts of the building's. Wall-mounted solar panels are photovoltaic (PV) systems installed on the vertical surfaces of buildings, as opposed to the more common rooftop installations. How to install wall mounted. A solar panel wall mount is a mounting system that secures solar panels onto walls. This cutting-edge solution offers many advantages for environmentally-conscious individuals and homeowners seeking to reduce their electricity bills. Here are some of the key benefits: Space efficiency: In cities or.
