

Photovoltaic panels installed 5 kilowatts

Overview

In 2025, a 5 kW solar panel system costs around \$13,550 before incentives, based on real installation data from across the country. But your actual price will depend on factors like your roof's complexity, local labor costs, the equipment you choose, and what incentives are. Optimal Sweet Spot for Homeowners: 5kW solar systems provide 40-90% energy coverage for average households while requiring only 299-400 square feet of space, making them ideal for most residential applications without overwhelming roof space requirements. Why trust EnergySage?

How much does a 5 kW solar system cost?

How much electricity will a 5 kW solar system produce?

Where can you purchase a 5 kW solar system?

Is a 5 kW solar system right for you?

If. A 5 kilowatt solar system is an effective energy solution for medium-sized homes, capable of generating sufficient power while providing financial and environmental benefits. A 5-kW residential solar array is the entry point for many small to average homes that want to offset a meaningful share of daytime use without covering every inch of roof. Installers quote two. Our 5 kW solar systems feature DIY solar kits which will produce at least 5kW (or 5,000 watts) of power.
