

Price of solar and thermal integrated panels

Overview

This comprehensive guide provides current pricing data from thousands of installations, expert insights from industry professionals, and real-world case studies to help you understand exactly what you'll pay for solar panels in 2025. Solar panels can lower your electricity bill by 75% or more, but the upfront investment is significant. Most homeowners spend between \$12,600 and \$33,376 to install a complete residential solar system in 2026, with the national average at \$19,873 before incentives. To find the most up-to-date solar panel costs in 2025, we compared research from the U. Strong Long-term Returns: Despite upfront costs, solar systems typically save \$20,000-\$60,000 over 25 years while increasing home values by approximately \$15,000, making them one of the most reliable home improvement investments available. Department of Energy (DOE) Solar Energy Technologies Office (SETO) and its national laboratory partners analyze cost data for U. solar photovoltaic (PV) systems to develop cost benchmarks. These benchmarks help measure progress toward goals for reducing solar electricity costs. Solar panels cost \$1,200 per panel, depending on the type of panel, home size, energy usage, and labor.
