

# Ranking of companies in terms of wind power and photovoltaic power generation

## Overview

---

The renewable energy sector is at the forefront of the global push for sustainability, with companies innovating to meet ambitious net-zero goals. According to Ember's H1 2025 analysis, their combined growth exceeded global demand growth by 109%, with solar alone. To meet this growing demand, top renewable energy companies in the world are investing heavily in solar, wind, hydro, and other renewable projects, targeting to achieve 100 GW of gross installed renewable power capacity by 2030. The International Energy Agency's (IEA) net-zero 2050 pathway targets almost 90% of global electricity from renewable energy sources by 2050, up from around 33% today. Explore this list as a starting point and connect with us to see how Inven can help you build tailored lists for sourcing and market discovery.
