

Sao Tome and Principe 2025 Energy Storage Subsidy

Overview

Find an overview of the electrification investment scenarios (2025 and 2030) for Sao Tome and Principe on the Global Electrification Platform (GEP). On one hand, global climate change poses a direct threat to our way of life; on the other, continued reliance on outdated fossil energy sources, such as imported diesel, is no longer sustainable. At present, the energy expenditures of São Tomé and Príncipe are the highest in the region. This is the most comprehensive and updated report on the status of renewable energy and energy efficiency in São Tomé and Príncipe, allowing an overview of current and Progress on target 8. The document reflects conclusions from public consultations held as part of its preparation. It was approved by the Government of São Tomé and Príncipe. Last week, São Tomé and Príncipe (STP) officially joined AMP and hosted a two-day project launch workshop, becoming one of the newest national projects under active implementation. Although around 70% of rural areas in STP are electrified, many communities remain off-grid or face unreliable supply. (Sustainable Development Goal indicators 7.2 will encourage green and sustainable.
