

Signing a contract for rural solar power generation

Overview

These solar projects feed the growing demand for renewable energy from big companies moving toward sustainability. Ag attorney shares points to consider before signing a solar contract. • Short and long-term uses of farmland?

. As we continue to see rural landowners offered renewable energy leases, it's important to remember the phases these agreements often include and what may happen during each phase. Contracts often last 20 years or more. You don't buy the system or own anything installed on your property during the term of the contract, you're entitled to use all the power the system produces. In this first part of our guide, we will explore key aspects of solar lease agreements. Landowners are increasingly approached by developers for solar energy leases, a trend bolstered by favorable government policies toward renewable energy.
